DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17 – 18 and 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Spratt et al..

Spratt et al., U.S. Patent No.4,897,703, discloses a recessed contact bipolar transistor. As shown in Figure 9, polysilicon interconnect 22 has sidewalls and is disposed on a substrate 10. A composite insulation layer comprises a first material 18 and a second material 19. These materials are disposed on the sidewalls such that the first material 128 is disposed in an upper sidewall region and the second material 19 is disposed in a lower sidewall region. S shown, the first material is thicker than the second material. Substrate 10 is described as a semiconductor material in column 4, line 13.

Allowable Subject Matter

Claims 19 – 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
